EDUCATION

Northeastern University

Boston, MA

Candidate for a Bachelor of Science in Computer Science

Sep. 2021 - May 2026

GPA: 3.4/4.0

Relevant Courses: Algorithms and Data Structures, Object Oriented Design, Theory of Computation, Discrete Structures

Activities: Asian Student Union (Freshman Representative Nov 2021 - May 2022), Club Valorant Team, Boy With A Ball

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, HTML/CSS, C#

Developer Tools: React, Node.js, JUnit, Git, Linux, Amazon Web Services, Amazon Alexa Skills Kit, IntelliJ, VS Code, Eclipse, Google Cloud Platform, AWS Lambda, Salesforce Apex, Unity, Datadog

EXPERIENCE

NYU Langone Health

New York, NY

Research Intern

Jun. 2025 - Aug. 2025

- Performed multisite MRI harmonization on a dataset of 20,000 scans using Python (neuroCombat, ComBat-GAM, CovBat) in Jupyter Notebook to enable machine learning model development
- Built visualizations in Matplotlib and Seaborn to illustrate preprocessing effects on data distributions and downstream model performance

Massa Products Corporation

Hingham, MA

Software Engineering Co-op

Jul. 2024 - Dec. 2024

- Developed a website using TypeScript and React to facilitate communication with company sensor hardware, enabling users to save, edit, and delete hardware settings via AWS DynamoDB
- Developed a GPS-based user interface for company product, implementing the feature that allows users to save, name, and manage individual units effectively through WinForms and C#

S2N Health

Boston, MA

Full-Stack Software Engineering Co-op

Jul. 2023 - Dec. 2023

- Laid the framework for end-to-end testing for the product website and Salesforce app utilizing Datadog's synthetic tests, ensuring application reliability and performance
- Addressed visual bugs and implemented new features using HTML, CSS, and JavaScript for the company's Salesforce application and standalone website
- Improved search functionality and filter processes on the Salesforce application and standalone website using Python and JavaScript
- Implemented forgot password functionality on the company website that allows users to reclaim their passwords through an automated email through API calls and token generation

Culinary Agents

New York, NY

Software Engineering Intern

Jun. 2022 - Aug. 2022

- Developed a custom Amazon Alexa skill in Javascript that allows users to access Culinary Agent's job search technology with voice recognition and search through over 1000 job postings based on position and location
- Published the Amazon Alexa skill on the Amazon online marketplace, seeing around 10 monthly users and earning an average of 4-stars in reviews
- Trained the Amazon Alexa skill with a data set containing over 5000 job positions to recognize varying but similar position names as synonyms for the search engine

PROJECTS

Image Processing Application | Java, JUnit

May. 2022 - Jun. 2022

- Developed a program that processes image files and allows users to apply filters, sharpen and blur, change orientation, and convert file types
- Implemented MVC and command design principles to allow new operations to be added smoothly
- Created a GUI using JavaSwing that allows users to choose an image file using file explorer, apply all program functions to an image, and preview the image changes before saving
